Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

1. Applicant made a provisional election in deference to a request for obtaining restriction groupings using applicant claim language lexicography rather than generic descriptive terminology. Accordingly, the previous restriction request is withdrawn and the new restriction requirement is made.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18 drawn to a method for delivering rounded articles from an unmetered delivery chute with an article transport, classified in class 221, subclass 1.
 - II. Claims 19-26 drawn to a system for storing and transporting rounded capsules with an un-metered gravity chute, classified in class 221, subclass 106.
 - III. Claims 27-33 drawn to a system comprised of a combination of rounded capsules and a chute dispensing system for storing and transporting rounded capsules with an apertured disc classified in class 221, subclass 264.
3. Invention I is related to inventions II and III respectively as apparatus and processes for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, process I may be used to deliver ball

bearings. In this case, the apparatus III may be used to dispense medicaments. In this case, the apparatus II may be used to plant seeds.

4. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as dispensing medicaments. See MPEP § 806.05(d). In the instant case, invention II has separate utility such as dispensing seeds. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. No claims appear to be linking claims.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Exmr. Michael E. Butler whose telephone number is (703) 308-8344.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Donald Walsh, can be reached on (703) 306-4173. The fax number for the Group is (703) 305-7687.
